TCP Cards -

TCP Cards (identifiable by the star in the circle bug) are HEG Fan Cards, and are considered to be a set in the Boot Hill block. This makes all TCP cards legal in Standard, Boot Hill Extended, and Boot Hill. For physical versions of the cards, depending on the printing and your event organizers rules, you will likely be required to use sleeves. If you are playing them as “print and play,” you will be required to either proxy them into the deck using AEG/WotC printed cards (For example, clearly marked Ghost Rock Cards) or use sleeves. It is illegal in an event (and based on the Creative Commons License HEG uses) to alter the cards in any way from their released form.

Two-Pack/Pulp Heroes Cards -

These cards are identifiable by the “Greek Beta symbol” as their bug. These are HEG Fan cards and are not intended to be played in ANY constructed format. The cards have duplicate abilities of other released cards and may have severe balance issues in a constructed format. They can be used in most sealed formats. (At this time, they have not been tested in Cube, if you get the chance to do so, please let us know how they worked out!)

OTHER FAN CARDS AND SETS -

These are not supported by HEG's tournament standards. It is completely up to your Tournament Organizer when and how you will utilize them. HEG encourages creativity and fan works, but HEG extensively play-tests our cards and gets a lot of review and feedback before we release a card, we cannot guarantee the same of other fan releases.
